Summary

Business graduate from UC Davis turned highly motivated full-stack web developer. Self-starter and hungry to learn new technologies, with a passion for creating clean and functional user experiences. Dedicated to design and making things look good.

Skills

Front-end: HTML5, CSS3, JavaScript ES6, jQuery, React.js

Back-end: Node.js, Express, PostgreSQL

Additional Tools: Mocha, Chai, Jasmine, Jest, Heroku, Enzyme, Node Package Manager (npm), Knex, Git, GitHub, Jira, Vercel

Recent Projects

Jobseek | [GitHub](#) | [Live](#)

- Track the status and details of your job applications by using this Kanban board application. Utilizes beautiful drag and drop functionality for a smooth user experience. Built from a personal desire for a clean, visual dashboard to track job applications.
- Built with: React.js, Node.js, Express, PostgreSQL, react-beautiful-dnd

Visions | [GitHub](#) | [Live](#)

- Visions is a custom designed website designed for selling professional photos. Users can browse photos, place them in a shopping cart, and receive an email upon placement of the order. A table keeps track of all placed orders for future fulfillment.
- Built with: CSS3, React.js, Node.js, Express, PostgreSQL, EmailJS

Experience

Northramp LLC

Rockville, Maryland

Consultant

August 2019 – March 2020

- Facilitated a daily stand-up meeting to ensure team awareness of tasks and meetings as well as blockers impeding progress.
- Developed biweekly status reports documenting accomplishments, goals for the next period, government required actions, risks and challenges, and top Kanban priorities for transparency to our government clients.
- Created a Service Prioritization Document, prioritizing services that need to be addressed by the number and average age of open tickets.
- Facilitated SDLM-style Sprint meetings on Jira with the IT Service Management team each month.

Gracepoint DMV

College Park, Maryland

Intern

July 2018 – May 2019

- Supervised a major indoor event of approximately 50 members, which entailed ordering supplies, preparing and serving food, coordinating with team members, and real-time judgment throughout the event.
- Organized weekly outreach events to promote regular student gatherings through Google Spreadsheets, communicating with teams to maximize publicity by efficiently passing out over 5,000 flyers.

Education

BLOC

December 2020

Full Stack Web Development Track

- Learned industry best practices and practical software development standards with a focus on HTML5, CSS3, JavaScript, Node.js, React, and algorithms and data structures.
- Created and deployed mobile-first applications while learning new languages and frameworks by collaborating several hours every week with a senior web developer.

University of California, Davis

Bachelor of Sciences, Managerial Economics

June 2018
